

Review360™ is a web-based platform that delivers a comprehensive system designed to facilitate and support a complete RTI and PBIS implementation.

## Complete RTI/PBIS Package

**Implement a comprehensive system of content and tools to support and sustain a PBIS and RTI implementation with fidelity, accountability, and data.**

Complex behavior systems often result in either a stalled implementation or ineffective procedures. Several initiatives have resulted in an effort to establish effective practices for behavior. Both Response to Intervention (RTI) and Positive Behavior Interventions and Supports (PBIS) are grounded in practices that focus on establishing proactive systems in order to improve the quality of instruction and create appropriate behavioral supports and interventions for all students. They employ a problem-solving model that aims to identify problem behaviors and then implement a range of interventions that are systematically used with students based on their specific issues and their demonstrated level of need.

**We know what works with behavior.**

Review360™ helps to implement what works in a practical and efficient manner.

***Not every teacher's and student's needs are the same.***

The integration of multi-tiered content and tiered data collection accommodates a variety of services matched with their levels of intensity.

### Multi-Tiered Content

- Best Practices content for implementing full RTI and PBIS core practices includes: Administrator Modules for establishing school-wide behavioral expectations, Teacher training Modules for establishing effective classroom management practices, and strategies to address Frequently Identified Behavioral Issues.
- Online Professional Development Modules embedded with a learning management system to monitor progress of module completion.

### Implementation Support Materials

- Applicable embedded materials such as Behavior Intervention Strategy Steps and Videos, School and Classroom Walkthroughs, Templates and Lesson Plans help to support the richness of the content and facilitate the immediate and practical implementation of Best Practices.

### Tiered Data

- According to the intensity of services, the level of data collection is tiered to meet the needs or requirements.
- Progress Monitoring from Office Referrals to customizable Tiers 2 and 3 Objectives-Based Plans provide applicable and detailed information relevant to the teacher and/or student's needs.
- Data is aggregated to provide real-time access to reports and charts to gauge progress, assess needs and ensure an efficient delivery of services.
